

VB.Net or C#, ASP.NET and Microsoft SQL Server Web Developer

Are you looking for an interesting opportunity where you can make a difference with in your work, work on new and interesting and diverse developments/projects, get totally involved, learn new skills, apply your knowledge in a relaxed but fast paced environment?

Are you dynamic, results focussed with a keen eye for detail? Do you have strong development skills experience in VB.NET, ASP.Net or C# with strong SQL experience?

Do you want to work in an organisation that values its IT Team? – after all we have over 35 in our IT team currently and due to our growth, development and new projects in the pipeline we are looking to grow this to over 50 staff this year. We are currently looking for a number of Mid and Senior Level Developers to hit the ground running.

Core essential skills include VB.Net, C#, SQL Server – ideally with experience in an Agile/Scrum environment (although this is not essential). Good knowledge of JavaScript, HTML and CSS. Experience of XSL would be a benefit.

Aside from being technically competent in the above, you must be passionate about developing IT solutions and have a desire to develop outstanding applications. This is a great fast paced team to work in and with this in mind we are looking for likeminded individuals, who view their career not just as a career, but a way of bringing your hobby into the workplace!

You will be responsible for design and development of innovative client facing travel based web sites. Developing, maintaining and improving internal systems (payments engine, accounting systems, extranet, hotels, flights systems etc). Of course you will be involved in continuous improvement of our legacy systems too.

You may have worked as part of a team or at team lead level. As we are looking to fill a number of roles, your experience will of course be hands on, but we are keen to hire a number of individuals that have a broad range of experience. If you have experience of developing in an enterprise environment of highly concurrent websites it will be a real advantage. As we are a Microsoft house you will be an expert on Microsoft systems.

This is a superb opportunity to join our rapidly growing, fast moving Online Travel Organisation with fantastic career opportunities.

So who are we?

Founded in 2003, Travel Republic (www.travelrepublic.co.uk) has grown over the last 8 years – from employing 4 staff and turning over £200k per year back in 2003 to now employing over 200 people and turn over in excess of £330M.

During this growth period, Travel republic has worked hard to maintain a “small company feel” where employees can and encouraged to, make a real difference. Ongoing innovation is the key to the to the company’s continued growth both in the UK and internationally.

Based in Kingston (4 minute walk Norbiton Station), our developers work with people throughout the organisation to create innovative solutions that solve the evolving needs of the business and its customers.

With four public facing websites and over 1 million page views per day, our web sites must be both attractive and highly usable. Travel Republic ranked 1st in a recent Web Credible survey of UK Travel Agent Sites and continues to work hard to maintain its position as one of the leading UK online travel sites. We have just opened our first European office and have others in the pipeline.

It is our strategy is to reward great performance, so if you can impress and make a big difference then you will see rewards.

To be considered for this role you will have

1. A Highly innovative and creative approach to solving problems and developing solutions
2. A Passionate for developing IT solutions and will possess a desire to develop outstanding applications
3. Excellent clear, communication skills, be highly enthusiastic, and have the ability to work on your own initiative
4. Strong time management skills. You will be bright, keen and have a willingness to be delivery focused

Key Skills needed

1. Minimum 3 years commercial VB.Net or C#, ASP.NET and Microsoft SQL Server Development skills essential
2. Good knowledge of JavaScript, HTML, CSS. Experience of XSL and advantage

Rewards

A market leading salary, coupled with 25 days holiday and annual performance bonus, discounts on products.

If you feel you're ready for a challenging and exciting career jump to work for a leading online business, then get in touch to discuss these roles as soon as possible.
