

Web Tester – Kingston upon Thames

Are you looking for an opportunity where you can make a difference in your role? Are you a dynamic, results focussed Web Tester with a keen eye for detail? Do you have strong Web Testing skills and experience gained from an Online Business?

Do you want to work in an organisation that values its IT Team? After-all we have over 38 people in our IT team and due to our growth, development and new projects in the pipeline we are looking to grow this department to over 50 staff this year.

We are seeking Web Testers who have been carrying out Testing on web based applications. You should have experience of writing and executing test scripts as well as tracking bugs. We are ideally looking for Web Testers who have had experience of working in an agile environment. In your current role you should be working on testing web applications through the full testing lifecycle.

As a Web Tester you will work alongside a professional team of testers and developers ensuring websites are delivered to the highest standard. This is a very fast paced environment with weekly releases so you must have worked in a fast paced environment previously.

We are looking for Web Testers that have at least 3 solid years experience, with a good university degree. You should have strong working of SQL. All of our development is carried out using Microsoft technology in .Net and C#, with Java Script.

You will be responsible for analysing requirements, carrying out Test Case Design, execution and exploratory testing, functional testing. Testing manually, selecting tests for regression and raise defect reports. If you have Automation testing it would be ideal. If you are ISEB Qualified it would be of benefit.

We are looking for enthusiastic hands on individuals, with a real passion for Web Testing, Someone who enjoys working to solve problems and being part of a multi-functional team. You will be self motivated, capable of working with limited supervision, proactively reporting on status and tasks. As a Web Tester you will have excellent communication skills, and able to communicate to all levels with ease. You should be capable of working to strict timescales and have very strong time management skills.

So who is Travel Republic?

Founded in 2003, Travel Republic has grown over the last 8 years – from employing 4 staff and turning over £200k per year back in 2003. We now employ over 200 people and turn over in excess of £330M.

During this growth period, Travel republic has worked hard to maintain a “small company feel” where employees can and encouraged to, make a real difference. Ongoing innovation is the key to the to the company’s continued growth both in the UK and internationally. Due to our rapid growth we are now keen to employ a significant amount of IT professionals over the coming months.

With all departments based in Kingston (4 minute walk Norbiton Station)

With four public facing websites and over 1 million page views per day, our web sites must be both attractive and highly usable. Travel Republic ranked 1st in a recent Web Credible survey of UK Travel Agent Sites and continues to work hard to maintain its position as one of the leading UK online travel sites.

The company's strategy is to reward great performance, so if you can impress and make a big difference then you will see rewards.
